HAFIZH ARMANSYAH BIN MOHAMAD AZMI

Software Engineering Graduate

Kuching, Sarawak, Malaysia | +60 14-289 2052 | hafizhazmi.kassim@gmail.com | LinkedIn | Github | Portfolio

PROFILE

Software Engineering graduate and Commissioned Reserve Military Officer with hands-on experience in mobile and website development. Capable in translating client needs into technical requirements and executing cross-functional IT operations. Seeking a graduate or entry level role to deploy scalable software solutions.

EDUCATION

Bachelor of Software Engineering (Hons) | *Universiti Malaysia Sarawak (UNIMAS)* 2022 – 2026

Foundation in Science | *Universiti Malaysia Sarawak (UNIMAS)* 2021 – 2022

Sijil Pelajaran Malaysia | *Kolej DPAH Abdillah* 2020

WORK EXPERIENCE

Operation Executive & System Analyst (Internship) | *Mutiara Technology Centre Sdn Bhd* Mar 2025 – Nov 2025

- Executed comprehensive Quality Assurance (QA) testing and debugging for production web applications, ensuring cross platform stability and wrote technical user documentation for enterprise clients.
- Partnered with the Chief Executive to facilitate stakeholder requirement gathering sessions and successfully translated client feedback into structured functional specifications for software project.
- Represented the firm independently in Miri, successfully co-facilitating a government staff training program alongside an external partner.
- Co-coordinated a Nurture Development event in Kuching and Bintulu to ensure smooth event execution and logistics.

PROJECTS

UNIMAS FoodHub | *Food Ordering System for Mobile Android Application (view)* Jan 2026

- Built a two-sided pickup ordering app in Flutter and Firebase, where customers browse menus, order, and track status, while vendors manage their own menu and fulfil orders.
- Added real-time order status updates with Firebase so customers can follow their order live, from placement to pick up.
- Managed the entire Software Development Life Cycle (SDLC) from initial UI/UX wireframing to database schema optimization and final system deployment.

MeteorShield Sarawak | *NASA Space Apps Challenge, Python & Streamlit (view)* Oct 2025

- Pulled and processed NASA's NEO Feed API and USGS earthquake data in Python, then used Matplotlib and Plotly to visualise asteroid and seismic risk across Sarawak and Southeast Asia.
- Simulated asteroid impact physics (blast radius, crater size, tsunami and seismic effects) and used AI to generate decision support summaries and automated PDF reports for emergency planning.
- Built an interactive Streamlit dashboard with hazard maps and a gamified Asteroid Launcher Mode, using Git for version control.

LEADERSHIP & INVOLVEMENT

Second Lieutenant (Leftenan Muda) | *Reserve Officer Training Unit (ROTU) Army, UNIMAS* Sept 2025

- Commissioned as an officer after coming up through the Cadet Officer track from 2022 to 2025.
- Supervised and briefed junior cadets as part of day-to-day unit operations.
- Took part in regular training and drills to maintain operational readiness.

TECHNICAL SKILLS

Programming Languages: Python, Dart, JavaScript, Java, C, C++

Frameworks and tools: Flutter, Streamlit, Firebase, MySQL, Git, GitHub

Web and data: HTML, CSS, REST API, LLM API, Matplotlib, Plotly

Testing and office: manual testing, bug reporting, user manuals, Word, Excel, PowerPoint

Spoken Languages: Bahasa Malaysia, English

CERTIFICATIONS & ACHIEVEMENTS

- Completed cybersecurity training for SMEs and entrepreneurs through the APAC Cybersecurity Fund, run with UNIMAS FCSIT, CyberPeace Institute, and Global Cyber Alliance, supported by Google.org (2025).
- Took part in the Top Coders Malaysia Python programming workshop (2024).

Soft Skills: Teamwork & Collaboration, Time Management, Problem-Solving, Adaptability
