HAFIZH ARMANSYAH BIN MOHAMAD AZMI

Software Engineering Student | *Aspiring Software Developer*

Kuching, Sarawak, Malaysia | +60 14-289 2052 | hafizhazmi.kassim@gmail.com | LinkedIn: Hafizh Armansyah | GitHub

PROFILE

Final-year Software Engineering student at Universiti Malaysia Sarawak (UNIMAS), graduating November 2026. Built a full-stack mobile app using Flutter and Firebase and commissioned as a Second Lieutenant through UNIMAS Reserve Officers Training Unit (ROTU). Looking for a graduate programme or entry-level software engineering role where I can apply what I have learned and keep growing with a team.

EDUCATION

Bachelor of Software Engineering (Hons) | *Universiti Malaysia Sarawak (UNIMAS)* 2022 – 2026

Foundation in Science | *Universiti Malaysia Sarawak (UNIMAS)* 2021 – 2022

Sijil Pelajaran Malaysia (SPM) | *Kolej DPAH Abdillah* 2020

WORK EXPERIENCE

Operation Executive & System Analyst (Internship) | *Mutiara Technology Centre Sdn Bhd* Mar 2025 – Nov 2025

- **Tested multiple live web applications** (including Kuching City FC and a local NGO), authored comprehensive user manuals, and provided cross-functional IT troubleshooting support.
- **Collaborated directly with the CEO** in client meetings to translate attendance management system feedback into actionable development requirements and an AI chatbot concept.
- **Represented the firm independently** in Miri, successfully co-facilitating a government staff training program alongside an external partner.
- **Co-coordinated a professional reunion event** in Bintulu for a Chargeman training cohort to ensure smooth event execution and logistics.

PROJECTS

UNIMAS FoodHub | *Final Year Project, Mobile Application* Jan 2026

- Built a two-sided pickup ordering app in Flutter and Firebase, where customers browse menus, order, and track status, while vendors manage their own menu and fulfil orders.
- Added real-time order status updates with Firebase so customers can follow their order live, from placement to pick up.
- Handled the whole project myself as my final year capstone, from requirements through testing.

MeteorShield Sarawak | *NASA Space Apps Challenge, Python & Streamlit* Oct 2025

- Pulled and processed NASA's NEO Feed API and USGS earthquake data in Python, then used Matplotlib and Plotly to visualise asteroid and seismic risk across Sarawak and Southeast Asia.
- Simulated asteroid-impact physics (blast radius, crater size, tsunami and seismic effects) and used AI to generate decision support summaries and automated PDF reports for emergency planning.
- Built an interactive Streamlit interface with hazard maps and a gamified Asteroid Launcher Mode so both scientists and the public could explore the data.

LEADERSHIP & INVOLVEMENT

Second Lieutenant (Leftenan Muda) | *ROTU Army, UNIMAS* Sept 2025

- Commissioned as an officer after coming up through the Cadet Officer track from 2022 to 2025.
- Supervised and briefed junior cadets as part of day-to-day unit operations.
- Took part in regular training and drills to maintain operational readiness.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java

Mobile & Web Development: Flutter, Dart, HTML, CSS, JavaScript

Data & Cloud: Firebase, MySQL, Matplotlib, Plotly

Office Tools: Microsoft Word, Excel, PowerPoint

Other: IT Project Planning & Team Collaboration

Languages: Bahasa Malaysia, English

CERTIFICATIONS & ACHIEVEMENTS

- Completed cybersecurity training for SMEs and entrepreneurs through the APAC Cybersecurity Fund, run with UNIMAS FCSIT, CyberPeace Institute, and Global Cyber Alliance, supported by Google.org (2025).
- Took part in the Top Coders Malaysia Python programming workshop (2024).

Soft Skills: Teamwork & Collaboration, Time Management, Problem-Solving, Adaptability
